

METALLURGIA—Index to Volume LXVII

Published by the Kennedy Press, Ltd., 31 King Street West, Manchester 3

JANUARY—JUNE 1963

	Page		Page		Page
LEADERS		Creep-Rupture Properties of Nickel-Base Alloys. Effects of Trace Contents of Impurity Elements on the, By D. R. Wood and R. M. Cook	109-117	Iron, Man of—John Wilkinson: Iron Master. By W. H. Sansom	15-18, 81-84, 88
Aluminium in Britain	55-56	D		L	
Designers in Engineering	259-260	Development and Production of the Aluminium Motor Car Bumper. By H. M. Bigford	57-62	Laboratory Trials on the Remelting of Steels by the Electro-Slag Process. By N. Robinson and J. A. Grainger	161-169
New Steel Plant, The	209-210	E		Large Rotors. Overspeed Testing of, AEI's New Test House at Trafford Park	29-31
Nickel Outlook, The	107-108	Effects of Trace Contents of Impurity Elements on the Creep-Rupture Properties of Nickel-Base Alloys. By D. R. Wood and R. M. Cook	109-117	M	
Progress in Ergonomics	159-160	Efficiency Improvement of Induction Heating Inductors. By R. W. Humpage	187-188	Man of Iron—John Wilkinson: Iron Master. By W. H. Sansom	15-18, 81-84, 88
Steel 1962-63	1-2	Electro-Slag Process. Laboratory Trials on the Remelting of Steels by the, By N. Robinson and J. A. Grainger	161-169	N	
ARTICLES		Engine Component Research—Associated Engineering's New Laboratories	85-88	National and International Steel Standards. By W. Barr	19-22
A		F		Nickel-Base Alloys. Effects of Trace Contents of Impurity Elements on the Creep-Rupture Properties of, By D. R. Wood and R. M. Cook	109-117
AEI's New Test House at Trafford Park—Overspeed Testing of Large Rotors	29-31	Foundry Technology. Progress in, by A. H. Sully	266-270	Nickel-Base Material in Gas-Turbine and Boiler Atmospheres. The Corrosion of, By E. J. Bradbury, P. Hancock and H. Lewis	3-14
Aluminising of Steel. Continuous Dip, By D. M. Dovey and A. Waluszewski	211-217	Furnace Installations. Recent Heat Treatment,—Annual Survey of Developments	271-290	Nodular Irons of 1-6% Si and of Silal Iron during Cycling to 1,000 C. Growth of, By R. J. Maitland	226-232
Aluminium Alloy at 200° C. at Low Rates of Strain. Pure Torsional Creep Tests on, By A. E. Johnson, J. Henderson and B. Khan	173-177	G		O	
Aluminium Alloys for Three Years in Nigeria. Atmospheric Exposure of, By K. G. Latimer and F. F. Booth	73-79	Gas-Turbine and Boiler Atmospheres. The Corrosion of Nickel-Base Material in, By E. J. Bradbury, P. Hancock and H. Lewis	3-14	Overspeed Testing of Large Rotors. AEI's New Test House at Trafford Park	29-31
Aluminium and its Alloys in 1962—Some Aspects of Research and Technical Progress Reported. By E. Elliott	121-131	H		P	
Aluminium Beer Cask Production—Alumasc Lightweight Fabricated Version	183-186	Heat Treatment Furnace Installations. Recent,—Annual Survey of Developments	271-290	P.E.R.A.'s New Research Applications and Technical Services Building	261-265
Aluminium Motor Car Bumper. Development and Production of the, By H. M. Bigford	57-62	Hot Hardness Tests. Estimation of Stress-Rupture Properties from, By R. J. Parker	219-223	Pure Torsional Creep Tests on Aluminium Alloy at 200° C. at Low Rates of Strain. By A. E. Johnson, J. Henderson and B. Khan	173-177
Associated Engineering's New Laboratories—Engine Component Research	85-88	I		R	
Atmospheres in Spectrographic Analysis. The Use of Special, By R. Farsky	51-54	Improvement of Induction Heating Inductors. Efficiency, By R. W. Humpage	187-188	Recent Heat Treatment Furnace Installations—Annual Survey of Developments	271-290
Atmospheric Exposure of Aluminium Alloys for Three Years in Nigeria. By K. G. Latimer and F. F. Booth	73-79	Impurity Elements on the Creep-Rupture Properties of Nickel-Base Alloys. Effects of Trace Contents of, By D. R. Wood and R. M. Cook	109-117	Remelting of Steel by the Electro-Slag Process. Laboratory Trials on the, By N. Robinson and J. A. Grainger	161-169
Automatic Mineral Treatment Control—Basic Information Sought in North Wales Project	23-27	India. Developments in Iron and Steelmaking with Special Reference to, By R. M. Krishnan, B. R. Nijhawan and R. D. Lalkaka	233-238	S	
Automatic Storage and Charging—Blast Furnace Raw Materials. By a Special Correspondent	178-182	Induction Heating Inductors. Efficiency Improvement of, By R. W. Humpage	187-188	Scottish Hot Strip Mill Commissioned—Colvilles' Ravenscraig Project Nearing Completion	132-139
B		Iron and Steelmaking with Special Reference to India. Developments in, By R. M. Krishnan, B. R. Nijhawan and R. D. Lalkaka	233-238	Steel Standards. National and International. By W. Barr	19-22
Beer Cask Production, Aluminium—Alumasc Lightweight Fabricated Version	183-186			Stress-Rupture Properties from Hot Hardness Tests. Estimation of, By R. J. Parker	219-223
Blast Furnace Raw Materials—Automatic Storage and Charging. By a Special Correspondent	178-182				
C					
Continuous Dip Aluminising of Steel. By D. M. Dovey and A. Waluszewski	211-217				
Corrosion of Nickel-Base Material in Gas-Turbine and Boiler Atmospheres. The, By E. J. Bradbury, P. Hancock and H. Lewis	3-14				

	Page		Page
T		Page	Page
Torsional Creep Tests on Aluminium Alloy at 200° C. at Low Rates of Strain. Pure, By A. E. Johnson, J. Henderson and B. Khan	173-177	Steel and High Purity Iron. Colorimetric Determination of Trace Amounts (2-300 ppm) of Chromium in, By P. H. Scholes and D. Valerie Smith	153-157
W		Steels (Highly Alloyed). The Use of Controlled Atmospheres for the Elimination of Inter-Elemental Effects in Spectrographic Analysis with Particular Reference to the Analysis of, By S. Muir, A. D. Ambrose and D. W. Swingle	251-257
Wilkinson, John; Iron Master. Man of Iron. By W. H. Sansom	15-18, 81-84, 88	Steel. The Simultaneous Determination of Sulphur and Carbon in Mild, By W. H. Hill	103-105
LABORATORY METHODS		Sulphur and Carbon in Mild Steel. The Simultaneous Determination of, By W. H. Hill	103-105
Aluminium Alloys Containing Molybdenum. The Analysis of, By W. Stross and J. Clark	47-49	SHORT ARTICLES	
Atmospheres in Spectrographic Analysis. The Use of Special, By R. Farsky	51-54, 50	AEI-Birlec Installation at Ley's Malleable Castings Co., Ltd.—Annealing Pearlitic Blackheart Malleable Castings	170-172
Bureau of Analysed Samples, Ltd. —Twelfth General Meeting of Co-operating Analysts	258	Aluminium Wire Mesh Welding Technique Perfected.	224-225
Carbon (and Sulphur) in Mild Steel. The Simultaneous Determination of, By W. H. Hill	103-105	Analysis Aids Productivity. Automatic,—Spartan Steel's Polyvac Installation	118-120
Chromium in Steel and High Purity Iron. Colorimetric Determination of Trace Amounts (2-300 ppm) of, By P. H. Scholes and D. Valerie Smith	153-157	Annealing Pearlitic Blackheart Malleable Castings—AEI-Birlec Installation at Ley's Malleable Castings Co., Ltd.	170-172
Colorimetric Determination of Trace Amounts (2-300 ppm) of Chromium in Steel and High Purity Iron. By P. H. Scholes and D. Valerie Smith	153-157	Atmosphere Heat Treatment. Controlled,—Details of an Interesting New Furnace	191-192
Contamination in Cold Crucibles. High Temperature Melting without, By H. F. Sterling, and R. W. Warren	301-307	Automatic Analysis Aids Productivity—Spartan Steel's Polyvac Installation	118-120
Erosion. Test Specimen Extraction by, Intransigent Materials Present No Problem. By P. J. C. Gough	205-207	Automatic Handling for Fissile Materials	31-32
Extraction by Spark Erosion. Test Specimen, Intransigent Materials Present No Problem. By P. J. C. Gough	205-207	Automatic High Speed Centreless Bar Turning Machine. Fully,	193-194
Iron (High Purity). Colorimetric Determination of Trace Amounts (2-300 ppm) of Chromium in Steel and, by P. H. Scholes and D. Valerie Smith	153-157	Automatic Multi-station Sheet Thickness Classifier	89-91
Melting without Contamination in Cold Crucibles. High Temperature, By H. F. Sterling and R. W. Warren	301-307	Automatic Spray Painting Exhibition	217-218
Molybdenum. The Analysis of Aluminium Alloys Containing, By W. Stross and J. Clark	47-49	Beryllium. 100 Ton Hot Pressing Vacuum Furnace for,	308
Simultaneous Determination of Sulphur and Carbon in Mild Steel. The, By W. H. Hill	103-105	Bonding Metals to Thermoplastics	157-158
Spark Erosion. Test Specimen Extraction by, Intransigent Materials Present No Problem. By P. J. C. Gough	205-207	Centreless Bar Turning Machine. Fully Automatic High Speed	193-194
Spectrographic Analysis. The Use of Special Atmospheres in, By R. Farsky	51-54, 50	Computer to Control Electric Arc Furnaces—Steel, Peech & Tozer Order Ferranti Argus System	270
Spectrographic Analysis with Particular Reference to the Analysis of High Alloyed Steels. The Use of Controlled Atmospheres for the Elimination of Inter-Elemental Effects in, By S. Muir, A. D. Ambrose and D. W. Swingle	251-257	Controlled Atmosphere Heat Treatment—Details of an Interesting New Furnace	191-192
		Deburring and Surface Finishing Small Components	177
		Electric Arc Furnaces. Computer to control,—Steel, Peech & Tozer Order Ferranti Argus System	270
		Electro-Magnetic Force. High Energy Metalforming by Precisely Controlled,	291-292
		Electrophoretic Painting Technique—Pilot Plant in Operation at Pressed Steel	189-190
		Electroplating Transfer System. Glydo Automated,	27-28
		Fissile Materials. Automatic Handling for,	31-32
		Ford's New Blast Furnace Blown in	14
		Fully Automatic High Speed Centreless Bar Turning Machine	193-194
		Gas Burner Research—Radiant-Heating's New Development Centre	239-241
		Gas Works Handling Equipment. Hard Chrome Cuts Wear on,	242-241
		Glydo Automated Electroplating Transfer System	27-28
		Hard Chrome Cuts Wear on Gas Works Handling Equipment	242-241
		High Energy Metalforming by Precisely Controlled Electro-Magnetic Force	291-292
		Jones & Laughlin. Largest Basic Oxygen Steelmaking Furnace Operates at, By a Special Correspondent	33-34
		Largest Basic Oxygen Steelmaking Furnace Operates at Jones & Laughlin. By a Special Correspondent	33-34
		Metallforming by Precisely Controlled Electro-Magnetic Force. High Energy,	291-292
		New Combined Creep and Fatigue Testing Machine, A	49-50
		Oxygen Steelmaking Furnace Operates at Jones & Laughlin. Largest Basic, By a Special Correspondent	33-34
		Painting Exhibition. Automatic Spray,	217-218
		P.E.R.A. Aid for Industrial Firms —Reducing Direct Manufacturing Costs	35-36
		Pilot Plant in Operation at Pressed Steel—Electrophoretic Painting Technique	189-190
		Precisely Controlled Electro-Magnetic Force. High Energy Metalforming by	291-292
		Pressing Vacuum Furnace for Beryllium 100 Ton Hot,	308
		Production of Spheroidal-Graphite Iron—Success of Rotary Furnaces as a Melting Unit	139-140
		Radiant-Heating's New Development Centre—Gas Burner Research	293-241
		Reducing Direct Manufacturing Costs—P.E.R.A. Aid for Industrial Firms	35-36
		Rotary Furnace as a Melting Unit. Success of—Production of Spheroidal-Graphite Iron	139-140
		Small Components. Deburring and Surface Finishing	177
		Spartan Steel's Polyvac Installation—Automatic Analysis Aids Productivity	118-120
		Spheroidal-Graphite Iron. Production of—Success of Rotary Furnace as a Melting Unit	139-140
		Strain-Gauge Technology. Advance in—Advantage of Semi-Conductor Types	207-208
		Vitreous Carbon, Plessey Develops,—New Material Has Wide Applications	208
		Welding Technique Perfected. Aluminium Wire Mesh,	224-225

NEWS AND ANNOUNCEMENTS		Further Export Order for Arch ..	293-294	Rolling Mill Orders for Robertsons ..	80
A.D.A. Research Scholarship ..	37-38	£170,000 G.E.C. Order for Sierra Leone ..	290	Select Conference on Ultrasonic Inspection ..	93
Advice on Investment Castings ..	38	George Kent (Europe), Ltd. ..	293	Silit Elements now Supplied by Elco ..	294
Alcan Industries Introduce New Service ..	34	Hardening and Tempering Bearing Rings ..	22	Special Design Free Forging Press ..	293
Aluminium Abstracts ..	143	Heat Treatment of Solids by Fluidised Baths ..	143	Stainless Razor Blade Steel ..	194
"Aluminium for Architects" Exhibition ..	38, 142	Higher Quality Iron Castings ..	307	Stainless Steel Road Transport Tanker ..	223
Aluminium in Architectural Ironmongery ..	194	H.N.C. in Foundry Technology ..	91	Stainless Steel Tube Company, New ..	38
"Aluminium in Structural Engineering" Symposium ..	38	I.B.F. Conference ..	195	Steel Mission to Japan ..	91
American Firm Buys Continuous Casting Machine ..	294	Imperial Aluminium Co., Ltd. ..	37	Steel Report Conference ..	223
A.N.C.C. Approve 9% Nickel Steel for Service down to—196° C. ..	260	Inco-Mond Sheffield Office ..	22	Stelvetite—Five Years of Progress ..	210
Arc Furnace for South Africa ..	188	Industrial Process Heating Symposium and Exhibition ..	160	Stone Manganese Marine, Ltd. ..	244-245
Aveley Electric's New Premises ..	243	Institute of Metals Medal Awards ..	141	"Superston" Licensees ..	38
B.I.C.C.—I.C.I. Joint Investigation ..	245	Institute of Metals Spring Meeting ..	93	Symposium on Aluminium Cables in Industry ..	141
Biological Treatment of Gas Plant Wastes ..	18	Institute of Welding Spring Meeting ..	197	Symposium on Metering in Industry ..	145
B.I.S.R.A. Advisors to Visit South Wales ..	37	International Conference on Magnetism ..	195	Symposium on Nuclear Fuel Reprocessing ..	105
B.I.S.R.A. Open Days at Swansea ..	93-94	International Creep Conference ..	196	Symposium on Quality Control in Metal Finishing ..	243-244
Blast Furnace Coal Injection System ..	290	International Die Casting Competition ..	196-197	Talk on Industrial Rating ..	72
Bolt Treatment Plant ..	106	International Electro-Heat Congress ..	197-198	Techniques of Non-Destructive Testing ..	293
Bright Annealing Line Order ..	244	International Polarography Congress ..	208	Three-day Courses at Battersea ..	37
Brightside Mill Order ..	290	International Standardisation of Iron Ores ..	218	Tin as a Structure Controlling Addition to Cast Iron ..	244
Britain's First Slab Casting Plant ..	34	International Welding Meeting ..	195	Titanium Alloy in B.R.M. ..	294
B.S.C.R.A. Member Services Section ..	141-142	I.S.I. Honours for Indians ..	94	Titanium Price Reduction ..	37
Bulk Handling Film ..	172	I.S.I. Medal and Prize Awards ..	195	Tonnage Oxygen Film ..	292
C.D.A. Annual General Meeting ..	195	Joint B.I.S.R.A./I.S.I. Conference ..	141	Treatment of Metal Plating Wastes ..	265
Centenary of Pioneer Metallurgist ..	245	Joint U.S.—British Enterprise ..	32	Ultrasonic Applications Course ..	39
Change of Addresses ..	143, 294	Labex 1963 ..	94	Welding Arc Research ..	293
Conference on Feeding Sand Castings and Ingots ..	94	Le Touquet Oxygen Steelmaking Conference ..	196	Welding and Health Conference ..	196
Conference on Thermal Loading and Creep in Structures and Components ..	142	'Listen to Steel' ..	218	"Welding in the World" ..	143
Conference on Thermal Loading and Creep in Structures and Components ..	232	London Engineering Exhibition ..	141	Wellman Incandescent International, Ltd. ..	238
Continuous Bright Annealing of Stainless Steel ..	37	Meeting Diary ..	2, 56, 108	W. H. A. Robertson's Extensions ..	194
Continuous Casting Agreement ..	117	Metal Finishing Conference ..	142	Wild Barfield A.H.F. Equipment for Spain ..	292
Continuous Gas Carburising Installation Order ..	88	Metal Manufacturers, Ltd., Australia ..	50	Wild Barfield Furnace for Rotax ..	308
Contract Vapour Blasting in Sheffield ..	120	Microanalysis Service ..	38	Wild Barfield Long Service Club ..	142
Correspondence ..	79-80, 106	Microchemistry Meeting ..	141	Wolfe Award for Creep Expert ..	108
Correction ..	270	M.O.R. Agents for Gilardoni ..	158	Yugoslavian Steelmakers Adopt Kent Control Systems ..	243
Corrosion Summer School ..	293	News in Brief ..	32, 36, 92, 140, 182, 290, and 308		
Courses at Sir John Cass College ..	243	New Crane with Aluminium Boom ..	145	RECENT DEVELOPMENTS	
Course on Materials for Use at High Temperatures ..	244	Noise and Vibration Meter ..	225	Alloy for Under-floor Heating Elements. (Henry Wiggin & Co., Ltd.) ..	247
Course on Mechanical Test Results and Their Significance ..	243	Non-Destructive Testing Service ..	188	Aluminium Alloy, New. (Alcan (U.K.), Ltd.) ..	148
Creep Testing Machine Export Orders ..	158	Non-ferrous Foundry Safety ..	28	Applying Uniform Thickness Films. (K. Chemicals Co.) ..	150
Crystolon Hot Rod Electric Furnace Elements ..	293	'NORAL' becomes 'ALCAN' ..	80	Automatic Billet Heater. (David Etchells (Furnaces), Ltd.) ..	97
Cupola Installation Modified ..	192	Overseas Conference on Aluminium ..	243	Automatic Welding Machine. (The British Oxygen Co., Ltd.) ..	297
Dataplotter Demonstrations ..	188	Pattern-making Materials Course ..	37	Cast Iron for Very Low Temperature Work. (The International Nickel Co. (Mond), Ltd.) ..	41
Die Casting Open Day ..	172	P.E.R.A. Conference on Machine Tools and Production Techniques ..	143	Cast Maraging Steel (The International Nickel Co. (Mond), Ltd.) ..	202
Ductile Iron Production Record ..	142-143	P.E.R.A. Jointing Conference ..	93	Centrifugal Separator for Grinding Machine Coolant. (Research & Control Instruments, Ltd.) ..	43-44
£100,000 Effluent Treatment Plant Electro-analytical Chemistry Course ..	197	Personal News ..	39-40, 94-96, 145-146, 198, 245-246, 294-296	Colortrack Recording Film. (Ilford, Ltd.) ..	247
European Vacuum Symposium ..	197	Phosphor Bronze Spectroscopic Standards ..	39	Croning Shell Moulding Machines. (Foundry & Metallurgical Equipment Co., Ltd.) ..	199
Extra High Yield Stress Steel ..	257	Pictorial News Items ..	39, 94, 95, 195, 196, 197, 244	C.S.L. Anti-Static Liquid. (Caulking Services, Ltd.) ..	299
Fifth Large Arc Furnace Ordered ..	120	Plastic Coated Steels by Consett ..	290		
First Forging Press with Integrated Manipulator ..	72	Pittsburgh Steel's Elphal Licence ..	245		
Firth Brown's New Press ..	192	Pressure Die Casting Safety Course ..	106		
Flicker-Compensation Equipment ..	294	Process Agreement for Ashmore, Benson, Pease, New, ..	105		
		Professor Max Kurrein ..	210		
		Pyrene Miller Limited ..	260		
		Research and Development Centre ..	294		
		Revised British Standards ..	169

AUTHOR INDEX

Ambrose, A. D., Muir, S. and Swingler, D. W.	251-257
Barr, W.	19-22
Bigford, H. M.	57-62
Booth, F. F. and Latimer, K. G.	73-79
Bradbury, E. J., Hancock, P. and Lewis, H.	3-14
Clark, J. and Stross, W.	47-49
Cook, R. M. and Wood, D. R.	109-117
Dovey, D. M. and Waluszewski, A.	211-217
Elliott, E.	63-72, 121-131
Gough, P. J. C.	205-207
Grainger, J. A. and Robinson, N.	161-169
Hancock, P., Bradbury, E. J., and Lewis, H.	3-14
Henderson, J., Johnson, A. E. and Khan, B.	173-177
Hill, W. H.	103-105
Humpage, R. W.	187-188
Johnson, A. E., Henderson, J. and Khan, B.	173-177
Khan, B., Johnson, A. E. and Henderson, J.	173-177
Krishnan, R. M., Nijhawan, B. R. and Lalkaka, R. D.	233-238
Lalkaka, R. D., Nijhawan, B. R. and Krishnan, R. M.	233-238
Latimer, K. G. and Booth, F. F.	73-79
Lewis, H., Bradbury, E. J. and Hancock, P.	3-14
Maitland, R. J.	226-232
Muir, S., Ambrose, A. D. and Swingler, D. W.	251-257
Nijhawan, B. R., Krishnan, R. M. and Lalkaka, R. D.	233-238
Parker, R. J.	219-223
Robinson, N. and Grainger, J. A.	161-169
Sansom, W. H.	15-18, 81-84, 88
Scholes, P. H. and Smith, D. Valerie	153-157
Smith, D. Valerie and Scholes, P. H.	153-157
Sterling, H. F. and Warren, R. W.	301-307
Stross, W. and Clark, J.	47-49
Sully, A. H.	266-270
Swingler, D. W., Ambrose, A. D. and Muir, S.	251-257
Waluszewski, A. and Dovey, D. M.	211-217
Warren, R. W. and Sterling, H. F.	301-307
Wood, D. R. and Cook, R. M.	109-117
